## ROSAN**BOSCH** LEASEPLAN

LeasePlan are a leading car leasing company based in Denmark. At Rosan Bosch Studio we were asked to design a new interior for their company headquarters. This included the design of a new showroom which includes reception desk and welcome area, interactive car displays, and an auditorium. Along with three floors of office space including a canteen and gym. We were briefed to optimise the work flows of the building for the employees whilst creating an environment which puts the customer first. LeasePlan's logo characterises the interior and creates an exclusive framework for the building. I was lucky enough to see this project out from start to finish with a heavy involvement in all aspects of the design.
