

Project: Stream of Life Cremation Garden

Location: Lincoln Memorial Park  
Lincoln, Nebraska

Date: March 2007

Firm: CPRA Studio

A large traffic circle entrance island was selected for a cremation garden development within Lincoln Memorial Park. Three preliminary concept diagrams (lower left) were created to develop the final concept plan shown here. This compact terraced garden included a water feature, an “eternal flame”, a sculpture, seating, a niche wall, family estates, and a variety of memorials.
