

Imagine if we all just and act on the things we now know. If we are honest about our actions have consequences on the people and earth planet. Imagine then, the difference we can make together.

Green Circle Salons believes that the salon and spa industry can play a crucial role in helping to erase the footprints of our past, while facilitating the growth of a healthier future; by simply redirecting what was once considered everyday garbage, waste hair, foils and color tubes,

Most people are not aware that donated hair is being transformed into fiber mats used in the clean up of oil spills on our oceans, or that hair, as it biodegrades, makes a great natural fertilizer.

out of landfill and into more innovative solutions. Together with a sustainable development team at the University of Guelph, green service and product suppliers across Ontario, and supported by our media partners at Canadian Hairdressers Magazine, we offer a simple solution to help salons reduce their environmental footprint.

More than a solution, Green Circle Salons is a movement; a community of salons and spas that are committed to igniting and supporting, a pathway for positive green change. We are about reimagining the way the world looks at beauty, and reinventing systems that both make great business sense, and are good for the environment.

Imaginez si nous sommes tous juste et agir sur les choses que nous savons maintenant. Si nous sommes honnêtes au sujet de nos actes ont des conséquences sur les gens et la planète terre. Imaginez-vous alors, la différence que nous pouvons faire ensemble.

Green Circle Salons estime que le salon et spa de l'industrie peuvent jouer un rôle crucial en contribuant à effacer les traces de notre passé, tout en facilitant la croissance d'un avenir plus sain, en redirigeant simplement ce qui était autrefois considéré comme déchet quotidien, les cheveux des déchets, feuilles et la couleur tubes, sur des décharges et dans des solutions plus innovantes. En collaboration avec une équipe de développement durable à l'Université de Guelph, un service de vert et de fournisseurs de produits à travers l'Ontario, et soutenue par nos partenaires médias chez Canadian Coiffeurs Magazine, nous offrons une solution simple pour aider les salons de réduire leur empreinte environnementale.

Plus qu'une solution, Green Circle Salons de coiffure est un mouvement, une communauté de salons et les spas qui se sont engagés à allumer et à l'appui, une voie verte pour le changement positif. Nous sommes réimaging sur la façon dont le monde regarde la beauté, et de réinventer systèmes que les deux font sens des affaires, et sont bonnes pour l'environnement.

PARIS

Proud
GREEN

Big or small, they're
heeding the call!

Everyone knows that, as people, we are dependent on the environment. This is not the real copy. It's simply to show where the real copy will appear. This is not the real copy. It's simply to show where the real copy will appear. This is not the real copy. It's simply to show where the real copy will appear.

"The overall waste in the industry is astonishing. The amount of excess product, color and waste water that goes down the drain is way too much. We need to keep our planet healthy and beautiful. It's not only good for environment, it's better business."

- Maurice Florio, owner of Florio chain of Salons

"The overall waste in the industry is astonishing. The amount of excess product, color and waste water that goes down the drain is way too much. We need to keep our planet healthy and beautiful. It's not only good for environment, it's better business."

- Catherine Moreau, owner of Laki Salons

"The overall waste in the industry is astonishing. The amount of excess product, color and waste water that goes down the drain is way too much. We need to keep our planet healthy and beautiful. It's not only good for environment, it's better business."

- Jannifer Philip, owner of XYZ Salons

"The overall waste in the industry is astonishing. The amount of excess product, color and waste water that goes down the drain is way too much. We need to keep our planet healthy and beautiful. It's not only good for environment, it's better business."
