

CORE 1 SHOULDER PADS

Concept:

2 pieces shoulder pads. The first part is a tight fitting t-shirt style made with stretchable mesh and Low density foam. The second part is an external shell made with high density foam. There is a minimum of protection to not interfere the movements of the player.

Shirt:

The shirt is a mix of a t-shirt and a vest. There is no velcro adjustment. The front is opening by a zipper on the side of the shirt. The padding is made with a 12 mm perforated LD foam. The fabric is a high quality stretchable mesh lycra style. There is a small collar like a t-shirt. The underarm is wide open without fabric.

Shell:

The shell will protect the shoulders, the spine, the ribs and plexus. The caps are made with molded high density foam covered with polyester fabric. The spinal-ribs-plexus protector is made with high density foam. It is attached in front with velcro.
