PlasStick 3-in-1

Clean, De-Stat, and Prep plastic substrates before printing with UV curable and eco-solvent inks for increased adhesion. Works great with any plastic substrates such as:

- COROPLAST
- POLYSTYRENE
- PVC
- HDPE

1. CLEAN
2. REDUCE STATIC
3. INCREASE ADHESION

GlasStick Adhesion Promoter

For adhesion of UV and LED curable inks to difficult substrates such as:

- GLASS
- METAL
- ACRYLICS
- HDPE
- COROPLAST
- POLYSTYRENE

There is no need to cure or double-coat. GlasStick is designed to give printing professionals excellent adhesion on glass and metal substrates in one simple step.
