

# Our new agitators speak volumes.

## Think about ITT.

### Introducing Flygt Top-Entry Agitators.

We invented submersible mixers, and revolutionized the treatment market when we introduced them in 1977. Since then, these amazing machines have proven themselves across a multitude of applications. The introduction of our Top-Entry Agitators takes the art and science of mixing to a whole new level of excellence, with huge agitated volumes from a single agitator, very low power consumption, lifecycle cost and environmental impact, long operational life, and hygienic handling.

Come learn about Flygt Top-Entry Agitators at Booth 5025 at WEFTEC 2010, October 4–6 in New Orleans, LA.
