

iRobot®

**iRobot Scooba® 380
Floor Washing Robot
doesn't just clean
your floors.**

**It cleans them
for you.**

Mopping and scrubbing floors is tedious, back-breaking work. And when you're done, your floors are still dirty. That's because every time you rinse your mop or brush in the dirty water and put it back on the floor, you reap-apply dirt. But here's a breakthrough that delivers cleaner floors automatically—without you having to do it. Scooba, the amazing floor-washing robot.

**Scooba preps, washes, scrubs
and squeegees in one pass.**

Just push "Clean" and Scooba goes into action. Its 4-stage cleaning system begins by picking up crumbs, sand, dirt and debris. Next, it puts down only

clean washing solution. Then Scooba gently scrubs your sealed hardwood, tile and linoleum floors, removing dirt, grime, and stuck-on messes. Lastly, Scooba squeegees the washed floor, picking up the

dirty water and leaving the floor clean and virtually dry. All in a single pass.

**Run Scooba when
you're on the run.**

There's no need to stick around while Scooba's at work. It automatically cleans each area of the floor an average of five times. It even gets beneath tables and chairs while avoiding carpets and stairs. *PC Magazine* writes, "[Scooba] does a better job of mopping the floor than you would do with...bucket and floor mop."

**The problem with the mop
and bucket method is
the mop and the bucket.**

**The proof is in the tank.
And in this risk-free offer.**

Seeing is believing. When cleaning is complete and you empty Scooba's dirty-water tank, you'll be amazed at all the dirt it picked up. You'll also be amazed at all we're offering with purchase: **a money-back guarantee, free shipping, and an interest-free payment plan option.**

Free Shipping for a Limited Time

**You won't believe how well Scooba cleans.
That's why we invite you to try it risk-free for 30 days.
I'm interested. Please contact me ASAP.**
