

EXPERIENCE of playing pool

"I like to play my shots quickly, like the pros."

"The size of the table affects my game, because I'm only small."

4) Setting up the balls

"I find it hard to get the ball all the right way round."

3) Breaking to start

"Power is defiantly an advantage when breaking"

1) Selecting which colour to go for

Some friends pay attention to the game, even offer advice. Some talk amongst themselves during the game, but always keep one eye on the game.

4) Potting the balls

They play complex shots to gain the advantage over their opponent.

8) Planning shots

Tom takes his time to assess the table, whilst his friends laugh and joke about behind him.

7) Executing the plan

A lot of players that play socially do not have the skill and confidence to complete all the shots that they go for.

6) The winning shot

A lack of space around some table seriously effects ho well players will perform.

5) Relaxing after

Drinking and talking plays a big part of the pool playing process. Often food and drink is bought before the pool is started. Or one player would buy the drinks whilst the other sets up the table.
