

# NEED EXTRA CREDIT?

Ask your professor about possible extra credit for attending speaker:

**Bill McKibben**

**University of Wisconsin-Stout**  
**Wednesday, February 18, 2009**

**7 PM**

350 is the red line for human beings, the most important number on the planet. The most recent science tells us that unless we can reduce the amount of carbon dioxide in the atmosphere to 350 parts per million, we will cause huge and irreversible damage to the earth. Learn how to reduce our current amount of carbon dioxide in the atmosphere back down to 350!
