

## Bed Bugs

Many people, children and adults alike, have trouble drifting off to sleep at the end of the day, a preference for many is to listen to music whilst falling asleep, and the Bed Bugs system provides them with a system that allows them to do so. The product is connected to any MP3 player, allowing the user to select their favourite playlist to drift off to, and a small night light allows illumination until the timer runs out and the system shuts off. In the morning the same MP3 player can be used to set an alarm clock.
