

EMDAT MOBILE

Convenient capture and management of clinical documentation

According to a recent survey, as many as 85 percent of physicians use mobile technology. Eliminate hardware cost and add convenience to your documentation workflow with Emdat Mobile. Available at no cost for both Apple iOS and Android devices, Emdat Mobile allows healthcare providers to create and complete their documentation from anywhere using a Wi-Fi network or cellular data connection.

Dictations in the palm of your hand

Robust functionality that maximizes productivity

- Convenient, easy to use, and fits any clinician's workflow preferences
- Real-time access to patient worklist, dictation and document templates and patient transcription history while dictating
- Provider-specific documentation workflows include dictation, templates and speech recognition
- Simultaneous access to review, edit and sign documentation 24/7/365
- Automatic report routing to referring physicians upon authentication
- Seamless integration to the electronic health record as a narrative report or structured document
- Safe, secure and HIPAA compliant
