

EMDAT PLATFORM BRINGS FINANCIAL AND PRODUCTIVITY BENEFITS TO LEADING CHICAGO-AREA ORTHOPEDIC GROUP

Madison, Wis. (May 20, 2012) – Emdat Inc., a leading provider of technology solutions designed to complement EHR documentation, announced a new case study today highlighting the time- and money-saving benefits their solutions brought to Illinois Bone and Joint Institute (IBJI).

With over 100 physicians providing orthopedic, rheumatologic, and podiatric services to more than 500,000 patients in Northeastern Illinois each year, Illinois Bone and Joint Institute (IBJI) needed a documentation solution that would be both economical and effective in maintaining clinician productivity. Emdat's unique pricing model and robust technology promised to do just that — decrease documentation costs and dramatically improve workflow and documentation efficiency.

Just six months after the initial implementation in their Libertyville division, all IBJI providers were using Emdat alongside their EHR. Across its divisions, IBJI realized a 50%, year-over-year average cost savings in documentation and correspondence costs.

"IBJI is a quantifiable example of the success we have had with top medical facilities," says Emdat CEO Randy Olver. "Our solution delivers the provider productivity and satisfaction that may be missing with other documentation methods available today. The ability to increase care quality while minimizing cost and supporting meaningful use objectives makes us the right fit for facilities who want to leverage their EHR with minimal resistance."

Emdat Mobile, a free mobile app that allows clinicians to create documentation on the go, was a significant factor in IBJI's success story. Emdat Mobile provides access to patient schedules and historic clinical information during the dictation process and compounds efficiency with document and dictation templates. By streamlining the documentation process, clinicians can maintain pre-EHR patient volumes without increasing the length of their workday. Both revenue capacity and patient satisfaction are retained.

“With Emdat Mobile, providers can see their patient schedule, dictate on the fly, upload, review, edit and authenticate with ease,” said Clara Joyce, Practice Administrator of IBI - Libertyville. “It gives them the freedom to focus on their patients during exams and quickly complete the task of documentation.”

Beyond the financial benefits, Emdat has boosted clinician and staff productivity, leading to increased satisfaction. Clinicians are pleased that Emdat facilitates patient-focused care and thorough documentation with its flexible, time-saving, easy-to-use platform.

Additional information on Emdat and its documentation solutions can be found at www.emdat.com.

ABOUT EMDAT

Emdat, Inc. is a leading supplier of web-based medical documentation solutions. Empowering over 20,000 clinicians globally, Emdat continues its single focus to create sophisticated technology designed to decrease cost and maximize productivity and accuracy of the document creation process while protecting the richness of the clinical narrative. Medical facilities, health care providers and documentation service organizations trust Emdat to provide flexible, user-friendly and cost effective solutions that streamline workflow and easily integrate with electronic health record (EHR) systems — automatically populating data — to help ensure successful adoption. Emdat's mobile app allows clinicians to generate documentation from anywhere with a WiFi network or cellular data connection.

Headquartered in Madison, WI, Emdat works with more than 2,600 medical facilities throughout the United States and a network of hundreds of documentation service providers worldwide. More information on Emdat is available at www.emdat.com.
