

# Improve EHR Usability, Simply Dictate

Mobile dictation. EHR auto-population. Reduced costs.

Emdat solutions help achieve meaningful use and bolster physician satisfaction by allowing clinicians to easily complete their documentation while leaving the auto-population of data to the EHR to us. With Emdat Mobile, clinicians can easily create encounter documentation by using their voice, which is proven to be the fastest, most complete form of documentation. This blended approach drives high productivity and increased revenue in a quick, efficient workflow familiar to clinicians, and ensures patient encounters are documented comprehensively.

More patients. More profits. More meaning.
