

*A prescription**

for greater self-confidence and superior health.

Regular dentures can't prevent bone loss.

Missing all of your upper or lower teeth can cause severe problems that even regular dentures can't remedy.

Implant-supported dentures are the only treatment method that helps to prevent bone loss, preserve your appearance, and provide solid protection against the slipping and chattering of regular dentures.

** Please note: no medication is included in this package.*

***Laugh, talk, and eat* with confidence again.**

FRESH/START
DENTAL CENTER

Your Dental Implant Specialists

Benefits

of implant-supported dentures:

- Help preserve the bone
- Help maintain the integrity of the facial structures
- Increase stability

- Eliminate the need for adhesives
- Help reduce pain from ill-fitting dentures
- Help to improve your eating habits – eating right can improve overall health

- Restore chewing ability – eat what you like
- Can improve speech
- Can improve self confidence
