The Dental Implant Center
of Memphis

*Partnering with you
every step of the way.*

Today, the innovation of dental implants continues to be an accepted and predictable treatment option that is quickly becoming the standard of care for patients with missing teeth. The Dental Implant Center of Memphis was created under the philosophy that all patients deserve the predictable treatment outcomes and optimal esthetic results that they are looking for.

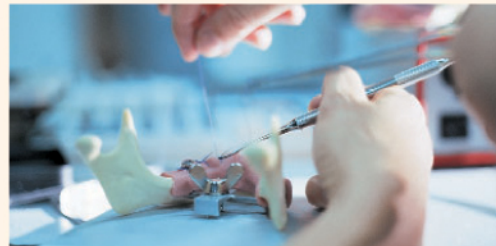

▲ THE TEAM APPROACH

At the Dental Implant Center of Memphis, we know that every team member plays a vital role in providing the best treatment outcomes for our patients. By providing a facility where certified surgeons, highly experienced prosthodontists, and skilled lab technicians can work together allows for enhanced communication during patient consultations, treatment planning, and the implant treatment procedure, which, all lead to better results for the patient.

▲ STATE-OF-THE-ART TECHNOLOGY

The Dental Implant Center of Memphis is fully equipped with the latest advanced technology for diagnosis, treatment planning, surgical placement, osseous reconstruction, and restorative replacement of missing teeth. From a CT imaging center to an SLA modeling center for reproduction of the anatomical form and bone structures, precision is further enhanced in the surgical process..

▲ PARTNERING WITH YOU

As a specialty practice, we realize and respect that the patients referred to our center are your patients. We recognize ourselves as your partners in the treatment process and that your patients will be referred back to you after treatment is completed. As such, there are many ways in which we can partner with you:

- We can place the implants and have your patients return to you for the restorative procedure either immediately after the surgery or after abutment placement, impression, and temporization.
- We can treat your patient's dental implant needs from placement of the implant to the final restoration and refer them back to you for all their other dental care.
- You can participate in our education training programs on implant treatment to further develop the skills needed to successfully incorporate implant dentistry into your own practice.

Led by Dr. Carl W. Schuller, a Board Certified Prosthodontist with over 25 years of experience, we are here to partner with you in providing your patients with advanced procedures and comprehensive care for reliable and optimal outcomes.

We see the tremendous opportunity to change implant dentistry in the Memphis metropolitan area and we are confident that with your support and partnership - we can.

Partnering with you every step of the way.
