

## SIMPLY BEAUTIFUL RESTORATIONS WITH MAY DENTAL ARTS

**May Dental Arts** is a full-service dental laboratory for all your restorative needs. State-of-the-art technology and skilled, artisan technicians come together to deliver precise, beautiful restorations for your implant and crown and bridge solutions. Each restoration is uniquely crafted to the patient's individual anatomy, creating a custom restoration that delivers excellent functional and esthetic results.

A strong materials portfolio through Straumann CAD/CAM lets us provide our referring doctors with choice, treatment flexibility, and fixed costs. Bone level custom abutments in zirconia and titanium feature the exclusive, patented CrossFit® Connection to ensure a precise implant-abutment fit and prevent against rotation.

At **May Dental Arts**, each order begins with quality: quality materials, quality technicians, and a quality manufacturer committed to research and development. Over the past two years, we've received almost a dozen Straumann CAD/CAM software updates, giving our laboratory and our referring doctors a competitive advantage by having access to the latest software, materials, and tools to create the best restorations.

CAD/CAM technology lets talented dental technicians create even more precise, beautiful custom abutment solutions by controlling the manufacturing and letting the technician focus on the design.

Contact May Dental Arts today and ask for Straumann CAD/CAM for your next implant case.
