# A Mini Residency in Implant Dentistry

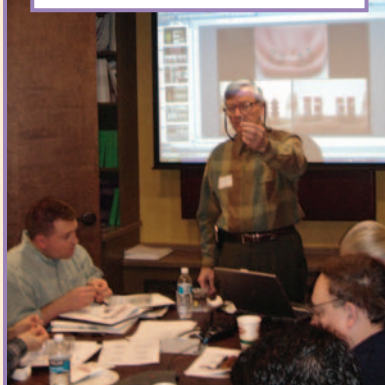

## ▲ DESCRIPTION

This Mini Residency will go through step by step preplanning, assessment of the position and angulations for implant placement with radiographic guides, fabrication of surgical guides, selection of the implant and surgical protocol for placement of the implants. **Our goal is to present a practical, predictable and conservative approach to implant dentistry.** The Mini Residency will be presented in two parts. Part I will emphasize diagnostic and treatment planning skills needed to prepare a patient for implant surgery. Restorative procedures will be presented for a single implant as well as for multiple implants for fixed and removable treatments for predictable esthetics and functional outcomes. Part II will have LIVE SURGERY with focus on surgical risk assessment, surgical protocols and step by step surgical procedures in a state of the art facility with CT technology.

## ▲ OBJECTIVES

- Present key clinical skills essential to effective diagnosis and treatment planning
- Demonstrate techniques needed to determine correct implant placement and implant selection
- Discuss procedures required to restore dental implants
- Demonstrate surgical protocol and procedures needed for predictable outcomes in implant placement
- Review procedures for maintenance and home care instructions for patients

**PART I: TREATMENT PLANNING**

**PART II: LIVE SURGERY**

## ▲ SPEAKERS

**Carl W. Schulter, DDS, FACP**, is a Board Certified Prosthodontist and the Director of The Dental Implant Center of Memphis. He is Past-President of the American College of Prosthodontists and is a fellow in the American College of Prosthodontists, the International Team for Implantology and the American College of Dentists. He is the President of Cagenix, a research and development company for dental implants and regenerative technologies. He has been involved with research and development of implant dentistry for the past five years and has lectured on implant dentistry for many years.

**David R. Cagna, DDS, MS, FACP** is a Professor and the Director of the Advanced Prosthodontics Program at the University of Tennessee Health and Science Center. He is a Board Certified Prosthodontist and a fellow of the American College of Prosthodontists. He is a Director of Education for The Dental Implant Center of Memphis and a consultant for Cagenix for research and development. He is on the editorial review boards for the Journal of Implant Dentistry and the Journal of Prosthodontics. He is co-author of the textbook Stewart's Clinical Removable Partial Prosthodontics and has authored numerous articles appearing in the dental literature.

**Darren R. Williams, DDS** is a Board Certified Oral and Maxillofacial Surgeon and is an Assistant Professor in the department of Oral and Maxillofacial Surgery at the University of Tennessee, College of Dentistry. He is on staff with the Baptist Hospitals of Memphis, Saint Frances Hospital and currently practices Oral and Maxillofacial Surgery at his private practice in Collierville, TN.
