

MINIMALLY INVASIVE PERIODONTICS AND IMPLANT SURGERY

COURSE DESCRIPTION

The synergy provided from the marriage of the periodontal and the restorable perspective can profoundly affect the outcome of contemporary dentistry. Today, it is unquestionably recognized that the interplay with the surrounding bone topography and gingival framework plays an equally important role in health and esthetic functional outcome. Despite this positive outlook, complications in treatment and outcome still occur. This lecture will focus on recognizing the proper diagnostic factors in periodontics and the influence of periodontal disease to help select therapy with minimally invasive surgical techniques and help achieve ultimate therapy to our patients.

COURSE OBJECTIVES

- Review recent updates on periodontal findings and predictable therapy as presented at the American Academy of Periodontology annual meeting in 2009
- Discuss how to recognize periodontal factors and limitations to predictable treatment planning
- Discuss clinical cases where the success rate of bone regeneration around natural dentition and edentulous ridge development has impacted case outcome
- Understand the role that minimally invasive surgery plays in periodontics and reconstructive implant therapy

INFORMATION

DATE	Wednesday, December 2, 2009
SPEAKER	Dr. Robert Mehanna
TIME	5:30 pm – 6:00 pm Registration 6:00 pm – 9:00 pm Program Dinner will be served
LOCATION	Capital Grille 10 Wayside Road Burlington, MA 01903 781/505 4130
TYPE	Lecture
SAC	Straightforward/advanced
CE CREDIT	2.0 hours of AGD credit
RSVP	To register, please call Andrea or Sharon at 781/729 9390 or fax the completed form to 781/729 6792 by Wednesday, November 25, 2009
