## **BUILDING A FOUNDATION FOR SUCCESS**

Introducing the new Straumann AlloGraft

### *Simplify with Confidence*

Straumann® provides the convenience of ordering from one trusted provider the solutions you need to help save or replace a patient's dentition.

## **BUILDING A FOUNDATION FOR SUCCESS**

INTRODUCING THE NEW STRAUMANN® ALLOGRAFT

**Now available in the US**

COMMITTED TO  
**SIMPLY DOING MORE**  
FOR DENTAL PROFESSIONALS™

## THE NEW STRAUMANN ALLOGRAFT **REGENERATE THE PATIENT'S OWN VITAL BONE**

Straumann® recently allied with LifeNet Health®, the worldwide leading tissue bank and organ procurement organization, to introduce Straumann AlloGraft, a broad range of high quality allograft products.

Vital bone tissue is the key component needed to **build a foundation for success** – whether it's the osseointegration of a dental implant or the functional regrowth of periodontal structures. Allograft is the bone graft most similar to a patient's own bone, providing a strong matrix to help regenerate your patient's new bone.

### **WITH SAFETY**

**Confidence for you and your patients**

**Straumann AlloGraft** is processed with LifeNet Health's proprietary and patented Allowash XG® technology, designed to:

- remove and inactivate viruses and bacteria with a Sterility Assurance Level (SAL) of 10<sup>-6</sup>
- maintain the biomechanical or biochemical properties of the tissue

**Now available for order in the US, Straumann AlloGraft complements our fully synthetic BoneCeramic™** to offer you a choice of quality products to support patients' own bone – all from Straumann Bone Graft Solutions.

## **ENJOY THE FLEXIBILITY** OF A BROAD RANGE OF GRAFTING SOLUTIONS FROM STRAUMANN
