

# End Note

---

This display sits on my window sill in my studio apartment in NYC. I use it every day. It allows me to have my watches on display, and it provides easy access when it's time to get ready for the day. It has been receiving a lot of attention from friends and co-workers who have visited. A few have even asked for one of their own. My initial goal was to make a display for myself that reflects who I am and what I enjoy. But if others like it just as much, I think that's great. So what do you think? Is there room for a watch display in the Nixon product line :)
