

GREENFIELD ARCHITECTURAL
DESIGN:FERNANDES RESIDENCE,GOA

The brief required us to develop a 500m2 high end residence with swimming pool and be-spoke landscape design,given a budget of 40million INR.The design aesthetic developed for the project combined contemporary clean lines with colonial Nostalgia,as is seen reflected in the handmade tile murals and detailed balcony railings on the facade.Only high end materials,such as polished granite,Italian marble and marble chip terrazzo have been employed for the finishes.
