

# Your computer scan isn't this good at removing threats...

If your computer's protected against viruses, you should be too...

Your keyboard and mouse are two of the most germ-infested areas you encounter. But there's no need to short circuit; the key to avoiding sickness can be found right on your desktop! Germ-X Hand Sanitizer kills 99.99% of germs in about as much time as it takes to update your Facebook status. It's portable size allows you to bring it with you wherever you go, and its unbeatable price separates it from the competition. So before you "boot up" your computer, give germs "*the boot!*" with Germ-X Hand Sanitizer.

It's What You're Missing.
