

COASTAL CASUAL

Coastal influence in patio design is big each year, and in 2017 it's more fun than ever. Abstract and illustrative patterns make for playful pillow fabrics. Watercolor mimics the texture of the ocean and lends handmade appeal. Slat designs are common in both traditional and bold dimensions. Weave patterns reflect rope skills of sailors. Weathered driftwood, tropical fish, and coral are all motifs in this style category as Coastal Casual reaches an all-time creative high.

ACCESSORIZE

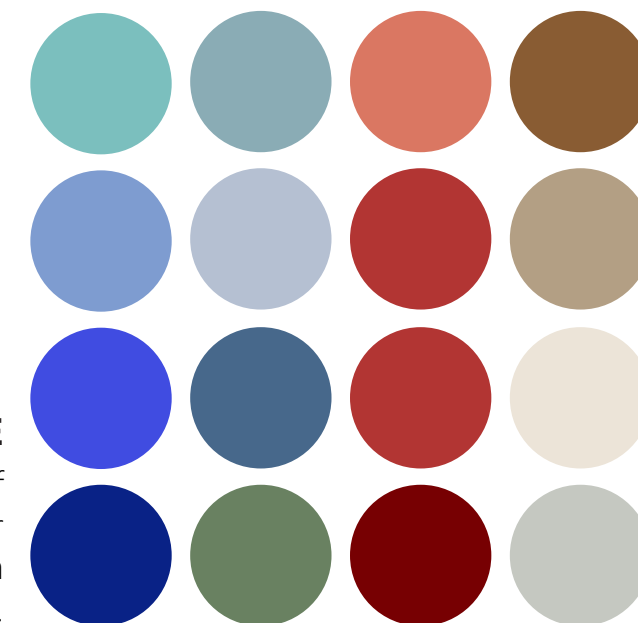

Across the board, accessories will be the main way that consumers add personal touch to their outdoor spaces.

ROBERTS 7-Pc. Dining Set, woven cushioned

This whimsical lantern adds lots of character to a set.

COLORS OF THE SEASIDE

Indigos, denims and aquas mirror the colors of the ocean. Sandy browns and whites are popular frame finishes. Reds and greens bring coral and sea vegetation to the living space.
