

WELCOME

Human Body Version 2.0

“Experience beamers” will beam...sensory experiences [and] neurological correlates of... emotional reactions out on the Web....A popular pastime will be to plug into someone else’s sensory-emotional beam and experience what it’s like to be [him].

Virtualization

- Began with imagination, memory, knowledge, and religion
- Invention of telephone stimulated the beginning of telepresence
- Modern virtual systems transmit a “quasi-presence”; it is more than just an image, it can move as we move

Nanobots will be able to...

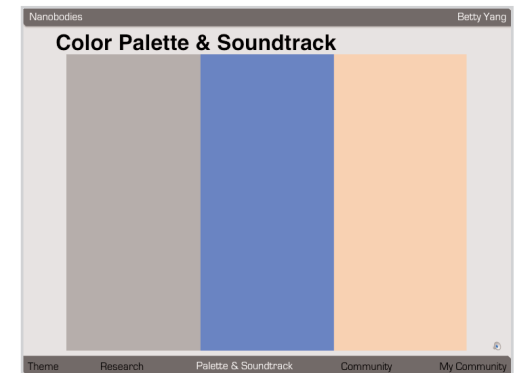

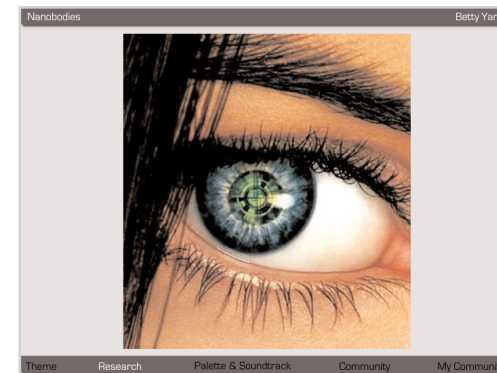

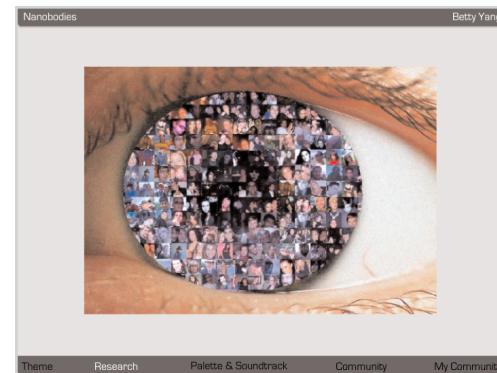

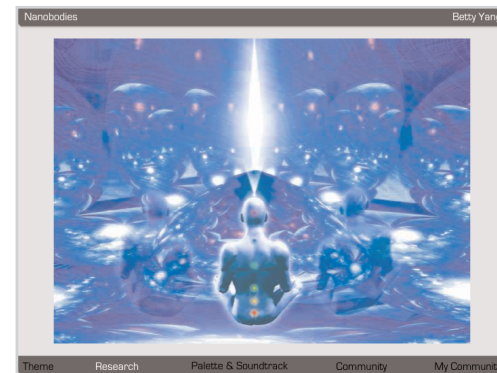

- Sense and adapt to any environmental changes
- Communicate and work together to solve problems
- Repair and replicate themselves
- Generate emotions, sensations, and mental reactions

Nanobots will be able to...

- Take up positions close to the nervous system and in the capillaries.
- For people to remain in reality, nanobots will stay inactive.

Nanobots will be able to...

- Nanobots will create virtual reality by replacing signals between nerves.
- Change appearance and voice

Online Communities

- The term community is derived from the Latin word communis meaning “with gift”
- Suggests a sense of reciprocated beneficence from working together
- Generate a shared language, rituals, and collective memories

Types of Online Communities

- Free-Nets – run by the community for the community to provide services to the public
- Community Networks –formed around a place, such as a neighborhood or city
- Communities of Interest –brought together by common lifestyles and interests

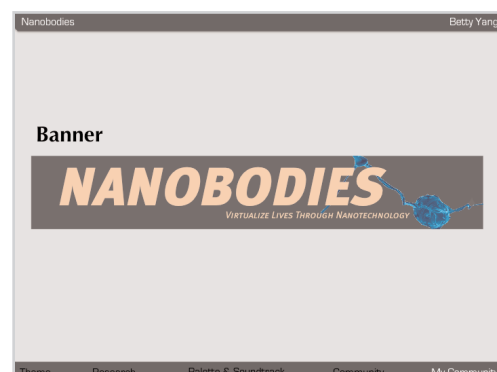

Types of Online Communities

- MUD Communities – based on games
- Audience Communities – established by fans to share, interpret, and discuss
- Media Communities – formed by website designers (for the audience communities)

Nanobodies will support and inform people of the theory of using nanobots to recreate human lifestyles.

Name: Nanobodies

Tagline: Virtualize Lives Through Nanotechnology

Events

1. A convention: gathering many current online virtual communities, demonstrating new virtual related technology, and featuring Jaron Lanier, Total Immersion Software, Eon Reality, etc.
2. A salon meeting about using nanotechnology on the human body, with Chris Pheonix and Dr. K. Eric Drexler.

THANK YOU
