Turning a Century

A man living to be 100 is rare. A brand in existence for 100 years is extraordinary. Not only has Elliott endured but it has greatly expanded its reach to service a global market.

It's hard to imagine that this empire began with one man and his patent. It makes you wonder if Mr. William Swan Elliott had any idea that his invention would spark such innovation and advancement.

Mr. Elliott recognized opportunity knocking with the use of the water tube boiler. A machine without efficiency creates a demand and Elliott supplied a solution with his creation. It was 1895 when he patented his boiler tube cleaner and began selling it. 15 years later, Elliott's company was incorporated, giving birth to the Elliott brand.

Fast forward to 100 years later and the services associated with the brand are many and varied. Elliott has evolved to become a global leader in the industry of turbomachinery. With this kind of forward progression, who knows what leaps and bounds the brand will make in the next 100 years.

Longevity speaks volumes when it comes to credibility. A name to be trusted is a name that has withstood, changed with, and grown with time. Here's to many more years of the world turning to Elliott.
