

Aston Martin

Transportation Design

2025 V12 Vanquish S

The purpose of this project was to gain a basic understanding of Automotive Design. I was to choose a brand or vehicle type to design my own technical drawings and base my sketches around those different packages. A final package was chosen and refined. More sketches were then based off the package, followed by 1/10-scale drawings and renders. Finally, a final design was chosen and a 1/4-scale tape drawing was based off that final design.
