

human factors

Here is a better view of the R1R2/L1L2 buttons. These buttons are generally used by the index fingers, but on occasion, the middle fingers can be used as well.

The left thumb has access to the d-pad, analogue stick, and select button. The right thumb has access to the start button, right analogue stick, and the four buttons.

Debris gets trapped in parting lines and small corners around the buttons and controller. This is caused by dirty hands from eating snacks. Cleaning tight corners require a toothpick.
