

STRATEGO

**IF THE FIRST MODE  
OF ACTION DOESN'T GET THEM  
THE SECOND ONE WILL.**

Stratego® Fungicide combines two fierce modes of action, a strobilurin fungicide and a systemic fungicide, into one superior product to protect winter wheat, corn and soybeans from yield-robbing diseases and provide resistance management benefits. These two intense modes of action, along with XLerate™ technology, give you healthier plants, a higher yield and most importantly, a more profitable crop. This year Stratego is the ultimate choice when it comes to protecting your wheat.
