

# Rimfire®

## Put resistant wild oats in their place.

Rimfire® herbicide gives you control of wild oats, even ACC-ase resistant biotypes, and activity on an unsurpassed number of tough weeds like foxtails, cheat, downy brome and Persian darnel. Rimfire provides a wide window of application with strong in-season residual activity that tells future weeds to keep out. It also has a wide range of tankmix partners, which means you're outfitted with a multitude of one-pass weed control options. When you need on-target weed protection to realize maximum yield potential, take aim with Rimfire.
