

# :: NIKE GOLF PUTTER

This Putter is especially designed for the golfer who has trouble controlling the momentum of the club head. With two anchor points from the shaft to the head a user has much more feel and control throughout the entire stroke. The back of the head is designed so that there is no interruption between the club head and the ground. The bottom of the shaft is also arched back to give the user an unobstructed view of the entire club head and ball.
