FILM INVESTMENT

rights
camera
action

High profile projects from the very best UK and international producers which attract such stars as Bruce Willis, Samuel L Jackson & Morgan Freeman.

Historically, the majority of investments into film partnerships have been into passive film leasing partnerships, which have benefited from specific tax legislation applying to qualifying British films to enable them to write off (for tax purposes) the cost of producing, or acquiring, a British film. This resulted in an accelerated tax loss which could then be shared amongst the partners of the partnership. This relief is commonly known as "Section 42" relief or "Section 48" relief.

upside potential

very attractive debate

Share in film's revenue from worldwide distribution.

Flexible structure for investment in **a manner which takes into account the** individuals circumstances and investment goals.
