

Enzyme Mother Project-popo Face mask

SPECIFICATION:

Enzyme Mother Project specialises in 100% natural, preservative-free products.
A unique method of process is applied to extract an element known as Betaglukan from commercial/house beer.

The project will involve one of their cosmetics products, the **popo Face mask**.
The product has been commercialised exclusively to **beauty salons and dermatology**.

This project will only involve the design of the information leaflet which will be included inside the existing package.

Client has requested for a brand new design of an information leaflet which may compliment the current face mask product.

- Existing logo, product name, font will be used in the design.
- Size of the leaflet is flexible as long as it fits into the current box.

PROJECT PHASE:

Phase 1:

-Phase 1 will involve the collection of images and photos regarding the 3 components of the product; **packaging, mixing bowl & brush, face mask**.

Phase 2:

-Phase 2 will involve the actual design of the leaflet.
