Engineering Services

What do we offer?

- Project management
- Mapping customer needs
- Ideation & concept design
- Visualization
- Prototyping
- Simulation
- Detailed product development
- Low volume production
- Testing & validation
- Patenting / IP management

Who are we?

A highly educated team with engineering experiences from multiple industries, focused on energy storage solutions for maritime, automotive, stationary and other applications.

design

material & chemistry

mechanical

Li-ion batteries

electrical

software & hardware

prototyping

test & validation

We'll guide you through the development process!
