

Discover Kimball

Clinic in New Orleans, which evolved into one of the nation's most prominent medical centers. He's also widely credited for being among the first to recognize the association between tobacco and lung cancer in the 1940s.

Today in Kimball, the South Dakota Tractor Museum has become one of the town's key attractions. While the museum specializes in the restored antique tractors that are owned by local community members, the museum has a little bit of everything. In its "Prairie Treasures" building, visitors are taken back in history, with items like the town's old jail cell to numerous old cars and buggies and a laundry machine. A one-room schoolhouse was moved to the grounds and the museum also has a blacksmith's shop, an outhouse and a separate building that hosts household goods from years ago.

Kimball is also home to the historic Holy Trinity Church, which was located at the community of Bendon in rural Brule County until the church was moved as part of its preservation in 1982. The Brule County Historical Society now owns the church, which was built in the 1890s and like so many towns in South Dakota, gave shape to the community in which it was located. It has since been restored and the historical society hosts annual events at the church, including a Quilt Show each year.

Welcome to the
South Dakota Tractor Museum
