

Charlotte NC

*For this project, we expanded our exclusive two-sided workstation design from the WFTV newsroom. Two of these anchored WSOC's new digital newsroom, which also included production and reporter's desks, a web media workstation, and a multi-curved, bi-level Assignment Desk. There were a total of twelve custom consoles in this project. Each furniture piece was rendered in 3D, for visualization, review and approval prior to manufacturing.*
