

Research & Dissertation

Your CCNH course work requires you to express yourself through research and writing, and the CCNH faculty wants to empower you to write well and with confidence.

The purpose of research is to afford the graduate student opportunities for advanced study in a chosen field; development of original ideas and to personally conduct research; production of quality reports on research; academic and intellectual challenges and contributions to scholarship; collaboration, cooperation, discussion, and debate of information among health professionals; and exploration and development of natural health and its evolving body of research.

To take full advantage of the research and writing opportunity, you can brush up on writing and grammar skills with our [E-handouts](#) — documents that address common or frequently executed writing errors. There are also instructions on how to read the proofing symbols on your papers, so you will be able to improve assignments .

Graduate students can obtain information about their program's required [dissertation](#). Graduate students can also view [abstracts](#) from approved dissertations, review [topic categories](#) for inspiration, or learn how to apply for the annual [Cheraskin Research Grant](#).
