University tour

Romania

2010

Make up
your
mind!

The Ștefan cel Mare University is a modern institution with over 45 years of tradition in higher education. In 2005, the University adopted the principles of the Bologna Declaration (1999) and of the Magna Charta Universitatum. The University is located in north-eastern Romania, in Bukovina, Suceava, a region of scenic beauty with a strong focus on social and cultural tradition, a source of national pride and inspiration throughout the centuries.

The University has continuously developed since its foundation; at present, the campus comprises almost 37.000 square metres of teaching facilities, two gymnasiums, a synthetic grass sports ground provided with a hot-air inflatable rooftop balloon in wintertime and equipped with a lighting system, as well as a Swimming and Kinetotherapy Complex. The University provides accommodation for over 1000 students in 4 residential facilities of European standards.

A renovated university restaurant of 220 seats, 2 exhibition rooms, a library with 4 reading rooms and all the university buildings equipped with teaching rooms, laboratories with computers and devices necessary for research and study, all these qualify the campus as a modern and dynamic space.

The Stefan cel Mare University was founded in 1963. The Pedagogical Institute initially comprised the Faculties of Philology and Mathematics and extended over the years with the Faculties of History and Geography and the Faculty of Physical Education. In 1977, the Pedagogical Institute acquires the official status of Higher Education Institute and initiates the first programmes in Engineering.

RECTOR

Professor Adrian GRAUR, PhD, Eng.
e-mail: adriang@eed.usv.ro

In accordance with the Decision of the Romanian Government of March 1990, the Institute becomes the Stefan cel Mare University of Suceava, in which 9 faculties and 5 departments are created and restructured:

VICE-RECTOR

Academic and Scientific Activity
Professor Emanuel N. DIACONESCU, PhD, Eng.
Corresponding Member of the Romanian Academy
e-mail: emdi@fim.usv.ro

VICE-RECTOR

Material Resources and Student Affairs
Professor Aurel BURCIU, PhD.

The degree ensures the right to conduct activities in the fields of physical and sport education within public or private structures, sports organizations, recreational or social associations. The graduates may organize and direct specific activities which require special attention in various sport fields, may supervise physical activities for people with locomotion-related disabilities.

Course offerings

The Faculty of Physical Education and Sport provides:

3-year Undergraduate programmes in:

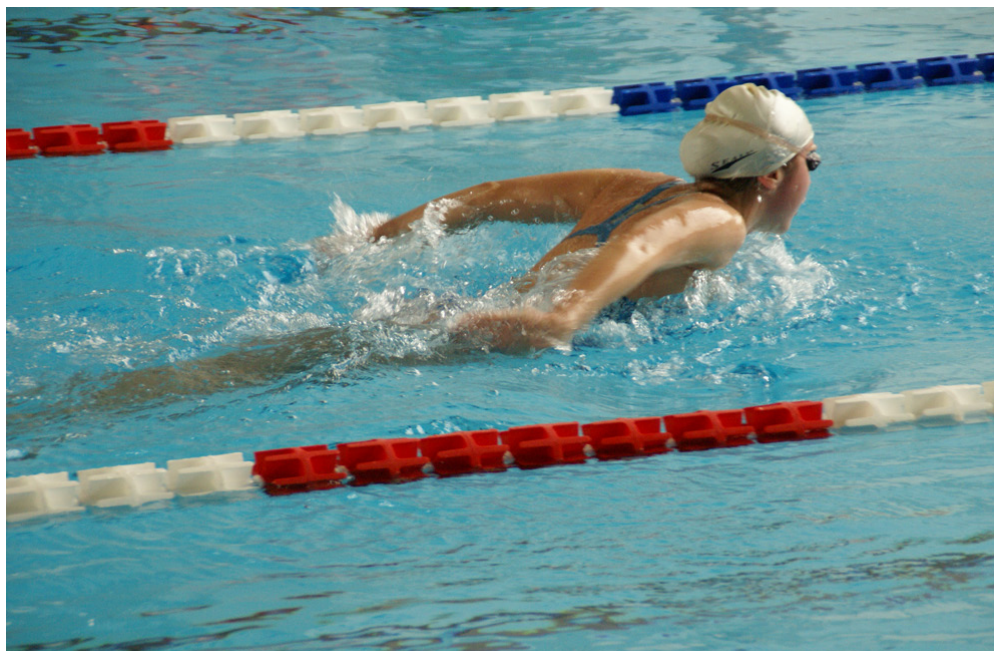

- Physical and Sport Education
- Kinetotherapy and Special Motricity

2-year Master's Degree programme:

- Pshysical education in schools and extracurricular activities.

Facilities

- a synthetic turf athletic field provided with a presostatic balloon and lighting system, handball, tennis, basketball, volleyball courts, a football field, and a running track;
- a gymnasium with bodybuilding equipment;
- a modern gym with tennis, basketball, handball, and volleyball courts;
- a Swimming and Kinetotherapy complex;
- a laboratory of bio-medical sciences;
- a laboratory for motion and functional evaluation;
- 2 lecture halls;
- 2 seminar rooms;
- a multimedia laboratory.

The different degrees ensure the acquisition of information required in the fields of processing and control of food products quality, as follows: quality control of raw materials, processing technologies, food packing, preservative, food products storage and transport.

Course offerings

The Faculty of Food Engineering offers Undergraduate, Postgraduate (Master's Degree and other Postgraduate modules) and Doctoral programmes. The 4-year Undergraduate programmes, full time, are the following:

- Food Products Engineering;
- Food Products Control and Expertise;
- Engineering and Management in Public Alimentation and Agrotourism.

The Master's degree programmes (full time) are:

- Food Products Control and Expertise (2 yrs)
- Food Product and Environmental Quality Management(1.5 yrs)
- Hygiene Management, Food Quality Control and Population Health (2 yrs)
- Education Management for Environmental Protection and Food Hygiene (1.5 yrs)

The Doctoral degree programmes are in the subject area of Material Engineering.

The main objective of the Faculty of Electrical Engineering and Computer Science is to provide an outstanding academic environment for highly trained future engineers who could successfully perform cutting edge scientific research, be employed in production, management, design and teaching, contribute and be recognized within the national and international engineering community.

Course offerings

The Faculty of Electrical Engineering and Computer Science offers Undergraduate, Postgraduate (Master's Degree and other Postgraduate modules) and Doctoral Programmes.

The four-year Undergraduate degree programmes allow students to specialize in Computer Science and Engineering, Automation and Applied Informatics, Applied Electronics, Industrial Energetics, Electrical Systems, Economic Engineering in Electrical, Electronic and Energetic Field (4 yrs.).

We offer two-year Master of Science degree programmes in: Computer Engineering and Process Control; Computer-Aided Visual Art, Design and Advertising Image; Computer Science and Engineering; Modern Systems for Energetic Process Control; Advanced Techniques in Electrical Machines and Drives; Informatics Management in Industry and Administration; Computer Networks; Software Engineering; Advanced Embedded Systems; Computer and Communication Networks.

Our Doctoral degree programmes focus on the following subject areas of electrical engineering: Electronic Engineering and Telecommunications, Computer and Information Technology and Electrical Engineering.

The policy of our Faculty is that graduates must possess solid knowledge in the studied subjects, team spirit in the activities of collaboration regarding the integration in projects at national and regional levels, as well as creative skills, leadership and work organization skills in the respective fields, in various engineering activities, in fundamental and applicative scientific research.

Course offerings

The Faculty of Mechanical Engineering, Mechatronics and Management offers Undergraduate, Postgraduate (Master's Degree and supervision and training Postgraduate modules) as well as Doctoral programmes.

The four-year Undergraduate subject areas are the following: Mechatronics and Robotics with a programme in Mechatronics; Engineering and Management with a programme in Economic Engineering in Mechanical Field; Mechanical Engineering with a programme in Equipment for Industrial Processes; Industrial Engineering with a programme in Machine Construction Technology and Engineering and Quality Management; and Environmental Engineering with a programme in Environment Protection and Engineering in Industry.

The 1.5-year Master's Degree subject areas are the following: Computer-Assisted Mechanical Engineering; Modern Processing Technologies and Equipment; Integrated Management of Labour Quality, Environment, Health and Safety;; Tribology and Mechanics of Contact; Applied Mechatronics; Techno-Economic Expertise and Evaluation.

The PhD programme covers the subject area of Mechanical Engineering- supervisor Professor Emanuel DIACONESCU, PhD Eng.

Our Faculty has agreements with highly reputed universities in England, Belgium, France, Italy, Poland, Portugal, Spain, Ukraine, etc. Our students and teaching staff members benefit from mobilities in these countries. Most of the contracts are carried out within the Erasmus and Socrates framework.

Course offerings

The Faculty of History and Geography offers 3-year Undergraduate programmes, 2-year Postgraduate and 3-year Doctoral programmes in History, Geography and Philosophy.

The Undergraduate programmes are structured according to the following subject areas: History, International Relations and European Studies, Geography, Philosophy, Political Studies, Social Assistance, Communication Sciences.

The Master's Degree programmes cover the following subject areas: The Romanians between the East and the West; Management of International Relations and Cross-border Cooperation; Tradition and Innovation in Cultural and Religious Tourism; Protection, Valorisation and Management of Heritage; European Studies; Assessment of Geographical Risk and Sustainable Development; Land-Use Planning and GIS Tools, Tourism and Regional Development; Global Studies. Culture and Communication; Counselling and Management in Human Resources; Organisational Ethics and Ethical Auditing.

The PhD programmes in the subject area of History are supervised by: Professor Mihai Iacobescu, PhD, Professor Dumitru Sandru, PhD, Professor Gheorghe Onisoru, PhD and Professor Dumitru Vitcu, PhD.

The modules offered provide the students with training and instruction in the large area of humanities, assisting them into acquiring abilities specific to the field of philology and communication sciences, but also team work skills and the capacity to collaborate with specialists in other domains.

Course offerings

The Faculty of Letters and Communication Sciences organises 3-year Undergraduate programmes, 2-year Master's degree and Doctoral programmes in the subject area- Philology.

The Undergraduate studies cover the subject area: Language and Literature, offering the following programmes: Language and Literature - Romanian, Spanish, Italian, French, English, German, Ukrainian; Universal and Comparative Literature - Romanian or Foreign Language and Literature (Spanish/Italian/ German); under the subject area- Applied Modern Languages, the programme - Applied Modern Languages (English/French) and under the subject area of Communication Sciences.

Master's degree programmes cover the following areas: Persuasive Strategies of Language in Communication and Public Relations, British Culture and Civilization in the Context of Globalization, Semiotics in Mass-Media and Advertising, Present Trends in Romanian Language and Literature, Hermeneutics and Literary Ideology, Romanian Literature in the European Context, Theory and Practice of Translation (French/English/German).

The PhD programmes in the subject area - Philology are coordinated by the following supervisors: Professor Sanda-Maria ARDELEANU, PhD, Professor Ion-Horia BIRLEANU, PhD, Professor Albumita-Muguras CONSTANTINESCU, PhD, Professor Mircea A. DIACONU, PhD, Professor Vasile DOSPINESCU, PhD, Professor Ioan OPREA, PhD, Professor Rodica NAGY, PhD, Professor Elena-Brandusa STEICIUC, PhD.

The Faculty of Forestry has continuously improved its technical resources, especially as a result of the active involvement in research projects. Up to date instruments for land measurements, professional equipment centres and tree measurement instruments are just a few examples showing the modernisation process.

Course offerings

The Faculty of Forestry offers 4-year Undergraduate programmes, 1.5-year M.Sc. degree programmes and Doctoral programmes.

Undergraduate programmes cover the subject area- Forestry with programmes in Forestry, in full time (4 years) and distance learning (4 years). The students are trained to become forest engineers with complex qualifications in land measurement and remote sensing, forest ecosystem management (e.g. dendrology, ecology, silviculture, entomology, hunting, etc.), wood harvesting technologies and primary wood-using industry, techniques for ecologic reconstruction and watershed management, as well as in forest economy and legislation.

Since 2010, the Faculty of Forestry also offers 3-year Undergraduate programmes in Ecology and Environmental Protection.

The two Master's degree programmes implemented by the faculty are targeting, on the one hand, the Conservation of Biodiversity and Forest Certification, and on the other hand, the Management of Wood Harvesting and Wood Processing Activities. Students from Master's degree programmes participate in three Erasmus projects regarding innovation in forest sector.

Personal and professional abilities of the graduates cover self-knowledge and selfassessment, efficient communication, personal development planning, pedagogical analysis of instruction items, assessment and evaluation of students' behavior, pedagogical project-making, abilities of assessment and development of students' personality, managerial abilities specific to the education system.

Course offerings

The Faculty of Educational Sciences offers 3-year Undergraduate programme in the subject area- Sciences of Education: Pre-School and Primary Education Pedagogy.

The Faculty of Educational Sciences with a programme in Pre-School and Primary Education Pedagogy provides initial professional training for the elementary school teachers for pre-school and primary education, helping them acquire the abilities to take on the responsibilities of being promoters of local, regional and European scientific, social, cultural and spiritual values.

Also, our institution aims at providing continuing education for the teaching staff in primary and pre-school education in Bukovina by offering courses for "definitivat" (permanent teacher certification) and "grad didactic II" (2nd degree certification), and new activities carried out to bring about innovation in the field of educational sciences in the Suceava area.

The Faculty staff participate in national and international research programmes such as: C Phare CBC, CNCISIS, COST, CEEX, JEAN MONET, SECURITY PROGRAM. The students participate in the National Olympic Contest under the aegis of AFER and in scientific sessions organised by the Faculty of Economics or other Romanian Universities with similar modules.

Course offerings

The Faculty of Economic Sciences and Public Administration offers 3-4-year Undergraduate and 2-year Postgraduate programmes.

The undergraduate subject areas are: Finance, Management, International Economics and Business, Economic Cybernetics, Statistics and Informatics, Accounting, Business Administration, Tourism, Administrative Sciences, Law.

The Master's Degree programmes cover: Management of Trade, Tourism and Services Enterprises, Management in the Public Administration of Countries in the European Union, Public Management, Economy and Globalization, Technical Expertise and Financial Evaluation (in collaboration with the Faculty of Electrical Engineering), Accounting and Financial Audit in Trade, Tourism and Service Enterprises; Accounting, Financial Audit and Examination of Accounts; Management and European Business Administration; Management and Business Administration; Management and Audit in Business and Administration; Management and European Administration;

The faculty also offers 6-12-month Postgraduate training courses.
