Audit Committee Responsibilities & Risk Management

ATLANTA

½ DAY

2009 Bank Directors' Continuing Education Series - Workshop I

Friday, April 3, 2009 - Atlanta, JHTC @ CBA Headquarters

With unprecedented events in the past year, many audit committees are wondering "what should we consider for 2009?"

The Audit Committee is the most important board level committee. The purpose of the Audit Committee is to assist the Board of Directors in fulfilling it's oversight responsibilities by reviewing the financial information which will be provided to the shareholders; reviewing the systems of internal controls which management and the Board have established; appointing, retaining and overseeing the performance of independent accountants; and overseeing the company's accounting and financial reporting processes and the company auditors' financial statements.

Tremendous pressures continue to be placed upon depository financial insititutions by state and federal regulator agencies and by the Department of Justice. This seminar is designed to further educate audit committees on their responsibilities for managing these areas in a continually evolving environment.

Register today and come learn from an industry expert while networking with other community bank directors and executive management.

Robbery & Hostage Workshop

MACON

1 DAY

During these challenging times when bank staff IS focused on a variety of important issues, bank security, especially robbery and hostage procedures, may be overlooked ...until you are faced with a robbery situation! One way to ensure that all employees stay focused on your bank's robbery and hostage procedures is for all employees to attend annual training as required under the FDIC regulation 326.

CBA is pleased to partner with Charles Williams, a physical security expert, to offer this new Robbery and Hostage workshop. Mr. Williams has enhanced his popular Bank Security Workshop to feature a new twist by taking a look at your bank from the perpetrator's viewpoint. The idea is to help bankers see things in their own organizations that they might otherwise overlook. For example: If your robbery and hostage training does not include in depth coordination between your bank and your locally responding law enforcement agency, a perpetrator might escalate the robbery in progress to a higher level, that is, the taking of a hostage.

Register today for this "must attend" workshop and come gain a fresh new look at the subject of physical security. All employees, from the frontline staff to the Board of Directors, will benefit from learning from Charles Williams, someone you've come to know and trust. Charles' unique training style will not only make a serious subject enjoyable, he will share new ideas and techniques that you can immedially take back and implement into your written bank security program thereby providing a safer banking environment for all employees and customers while minimizing your compliance risk

Highlights

- FDIC Regulation 326: (Authority, purpose, scope)
- Key elements of a good security plan
- A view of your bank from a perpetrator's viewpoint

The Community Bankers Association is the only organization in Georgia that represents the interests of community banks exclusively. For over 40 years, our mission has been, and will continue to be, to promote the preservation and continued development of locally, independently-owned community banks in Georgia; and the philosophy of hometown banking through unified efforts of its membership and staff. Today, the Association has over 300 community bank members who utilize four main areas of service: Education, Networking, Group Purchasing and Political Affairs.
