

## ICD-10

October 1<sup>st</sup> 2015 will be here before we know it. The majority of Healthcare Systems are dealing with Implementations, Upgrades, or any number of other projects that are consuming time and resources. ICD-10 is yet another initiative that is critical to the financial stability of your organization. Brookmeade Healthcare has the resources and project expertise to assist you with all phases of your ICD-10 project.

### **ICD-10 Phases:**

Phase 1: Project Governance, Strategy Development, and Resource Allocation

Phase 2: Design and Workflow Decisions

Phase 3: System Build for ICD-10

Phase 4: Testing and Training

Phase 5: Post Live Monitoring, Stabilization, and Optimization

**Challenges:** How do we get there? Planning and Assessment is the first critical step to a successful ICD-10 project. If you have not properly assessed where your gaps will be within your Billing, Clinical, and Reporting Master files, it will be impossible to achieve your Health System's financial goals. Once the Plan has been developed, and gaps identified, the process can begin.

Training is obviously the most resource-intensive portion of this initiative. No one will be able to commit 69,000 codes to memory. The key is to teach what is most frequently used within a given department or clinic.

**Solution:** Brookmeade Healthcare has all your solutions for these challenges. Our highly trained staff will provide any level of assistance you need for planning, assessment, and implementation of ICD-10. Once those phases are completed, our training staff will then share their expertise with your staff to guarantee a smooth transition.

Not only is our staff highly trained and professional, but our company culture is rooted in our value system. At a time when so many companies are jumping into the Healthcare industry to capitalize on all of the initiatives that are overwhelming the Provider market, we have stayed true to who we are. We have always focused on employee growth, client partnership, and a strong delivery model. At a time of chaos these three pillars ensure success for any project.
