

Concept Statement

The concept for Northshore Dermatology Associates is to create an upscale office space that establishes a welcome and relaxing environment for both the clientele and staff.

The design intent that will be incorporated throughout the space is comparable to the sensations one gets when viewing a sunrise. These sensations will welcome, refresh, and make the clients feel full of life. The tranquil atmosphere will be achieved by the use of warm colors, with cool accents. When leaving the skin facility, clients will take with them an experience that stimulates a sense of renewal and inner peace, like beginning a new day.
