

WILL YOU BE ABLE TO FIND HEALTH CARE WHEN YOU NEED IT?

Austin has good doctors & good health care. But, between 2000 and 2010, Travis County had the fastest growing 55 to 64 year old population in the U.S., & the second fastest growing senior population.*

Proposition 1 will help:

- ❁ Create a pipeline of doctors and health care professionals who can care for our growing and aging population.
- ❁ Build on our good care by expanding local treatment options for patients facing serious, complex illnesses so you and your family can receive therapies right here in town instead of having to travel for care.
- ❁ Help those without insurance avoid expensive emergency room visits by providing preventative care, at primary care community clinics.
- ❁ Allow Central Health (or us) to more than double our money for enhanced health care through federal matching funds that will be otherwise lost.

Vote for Proposition 1 - Health Care for You & Your Family
