

# A Health Center designed with *you* in mind...

***At Shannon's Adult and Senior Health Center we help you in three principal ways:***

**1** Typically, you first come to us because you have an illness such as a cold or the flu. We'll treat that right away.

**2** We also diagnose and treat chronic conditions associated with aging, such as hypertension, diabetes, heart disease, arthritis, and mental functions.

**3** Reflecting our commitment to caring for the whole person, we provide health education, insurance counseling, living will guidance, community education, and other services.

**Call for an appointment today.**

Brenda Owens, M.D.

Gary Nussey, M.D.
