Dexter Morgan is a blood spatter pattern analyst for the Miami police. He's also a sociopath completely incapable of normal human emotions, and a serial killer. His adoptive father, a retired policeman, recognized Dexter's tendencies early on, and encouraged him to channel them more socially productive. Now someone is murdering prostitutes, and disposing of the bodies in similar to Dexter. The killer seems to be sending Dexter a message. But no one but Dexter is capable of interpreting that message, least of all Dexter's sister Deb, a cop assigned to the case who's totally unaware of Dexter's extracurricular activities. Dexter must make a choice: should he help Deb make an arrest... or help the killer whose work he so admires?

"...humorous, self-deprecating, smart and sometimes lyrical, it's a macabre fun ride... A gripping, deliciously offbeat novel that announces the arrival of a notable new talent."
