

# PHILIPS

sense and simplicity

## Product Testing

**When I used the trimmer for myself, you can tell that I obviously really needed to use it! After a couple of miraculous minutes in front of the mirror, I was very neat and tidy.**

**Having never used an electrical beard trimmer, (I had used scissors before), I was pleasantly surprised to how easy it was to use. I was also surprised that the razor did not tug at my hair. When I was finished, it was easy to clean as all I had to do was wash it under the tap. Any stray hairs were easy to get with the cleaning brush. Philips have managed to take the hassle away from trimming and have made it almost enjoyable. Therefore, to conclude:**

- ✓ Easy to use
- ✓ Easy to clean
- ✓ Trims without tugging
- ✓ Gives a neat, even trim
- ✓ Unique Philips style
