

..... "Assisted living is an environment that stimulates seniors physical and mental self and nurtures their soul." .....

## Assisted Living

This Assisted Living project was my Senior project. As someone who had personal experience with Assisted Living facilities, it was a project that hit close to home. I strived to create a space that allowed seniors to live with grace and dignity.

It was important to keep the space both welcoming and stimulating while providing a sense of ease for the residents regarding care and maintenance. Each resident room included an ADA standard bathroom and kitchen to allow for privacy if so desired. Hallways were color coded to provide queuing for the residents along with ample signage and labeling. With cozy 'apartments' and sufficient activities and resources throughout the building, this often times overwhelming change will feel like your home away from home.
