## INDUSTRIAL DESIGN

### BIO

I grew up in a small town in the middle of nowhere, or I like to think so. Wrestling has played an important part in my life and has given me my ability to keep going when things might not have gone my way. This has also made me very competitive and hard headed. I enjoy participating in physical activities of all sorts and I'm an adrenaline junkie.

Age: 21  
Hometown: Eureka, IL

### PHILOSOPHY

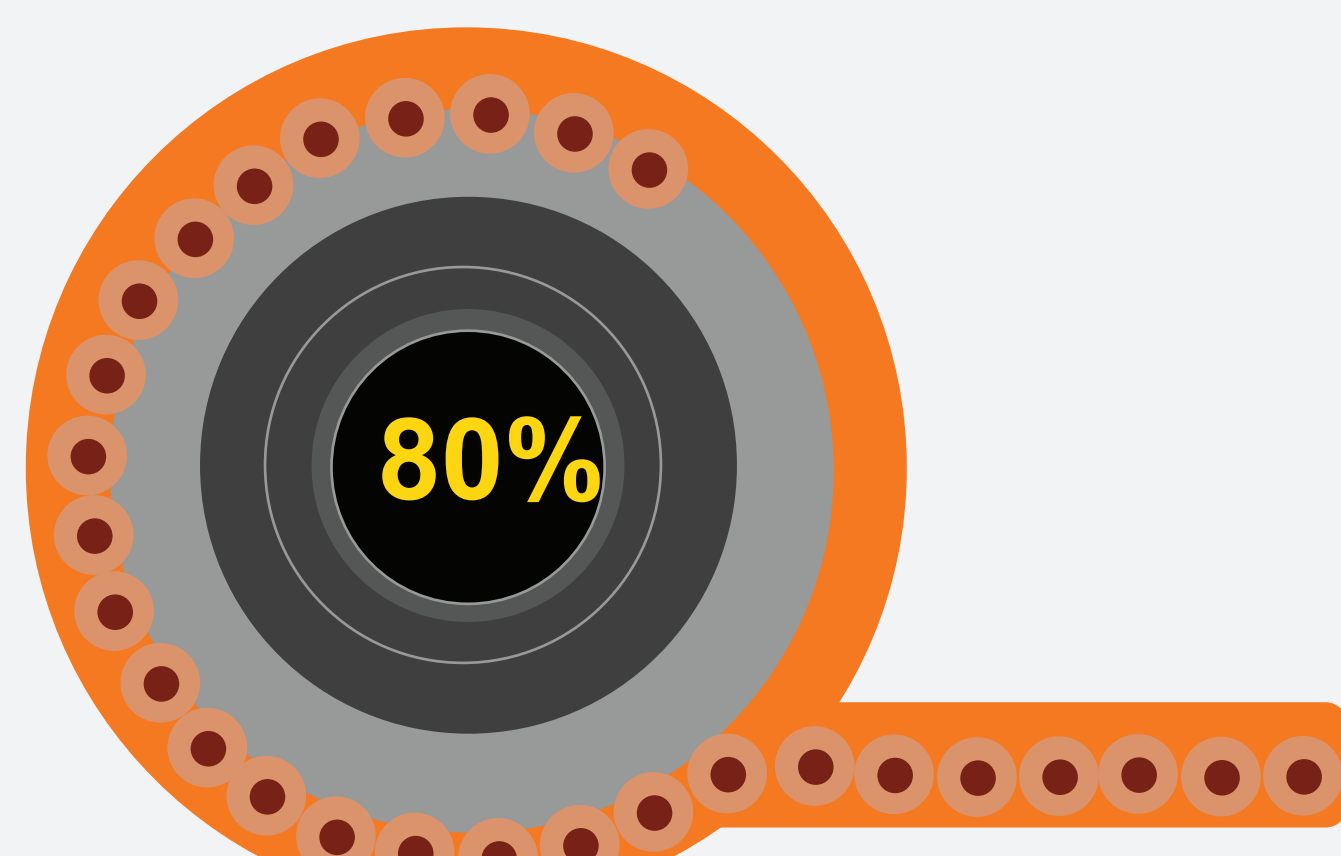

There should always be a reason for design, no matter the circumstances. This means that every reason is a good reason no matter what. Even if the reasons were detrimental to someone or something there was a reason for it. Reason gives you purpose, without purpose what is there?

## K.I.C.A.Z.

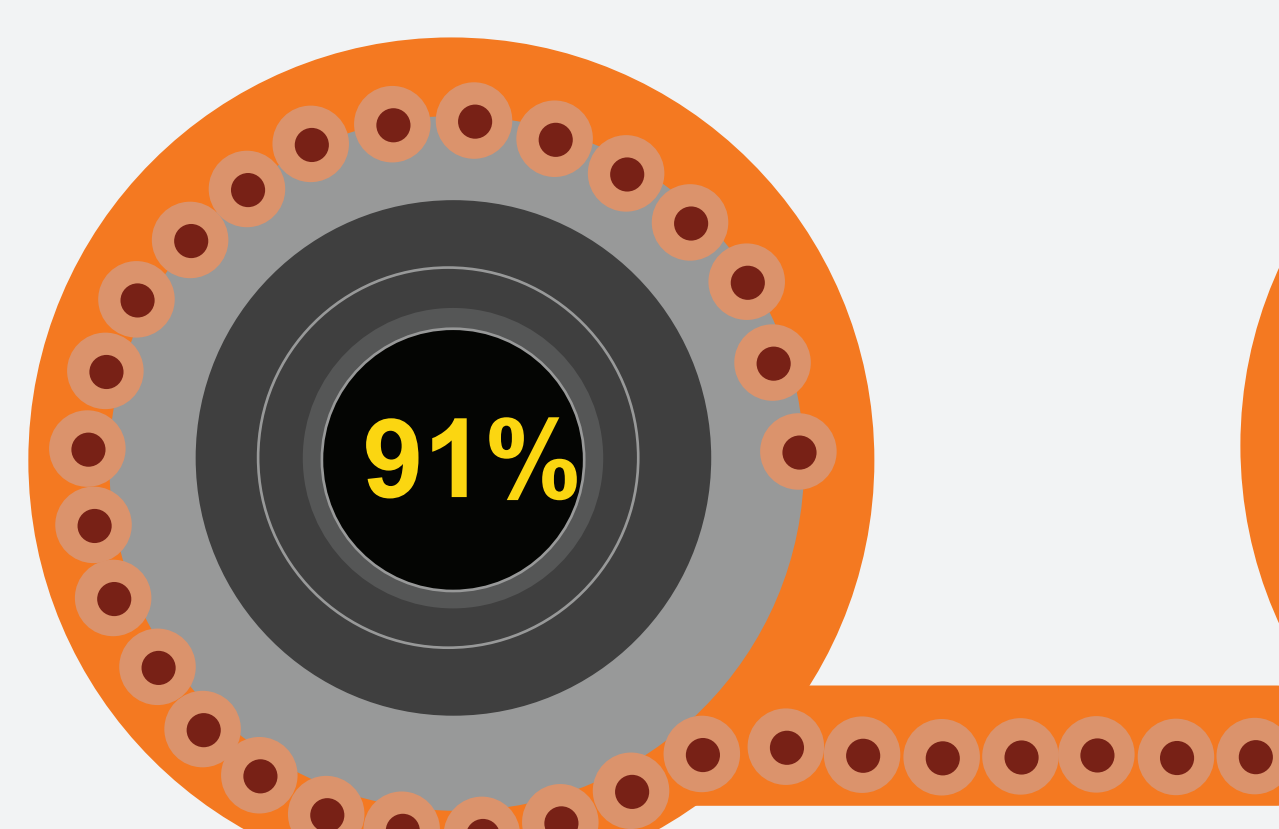

### Kit Improving Combat Against Zombies

Utilizing Molle technology a drop leg designed specifically for HVZ use and HVZ gear. A combination of holsters and pouches make the entire thing customizable, enabling any player to put their own personality into the system.

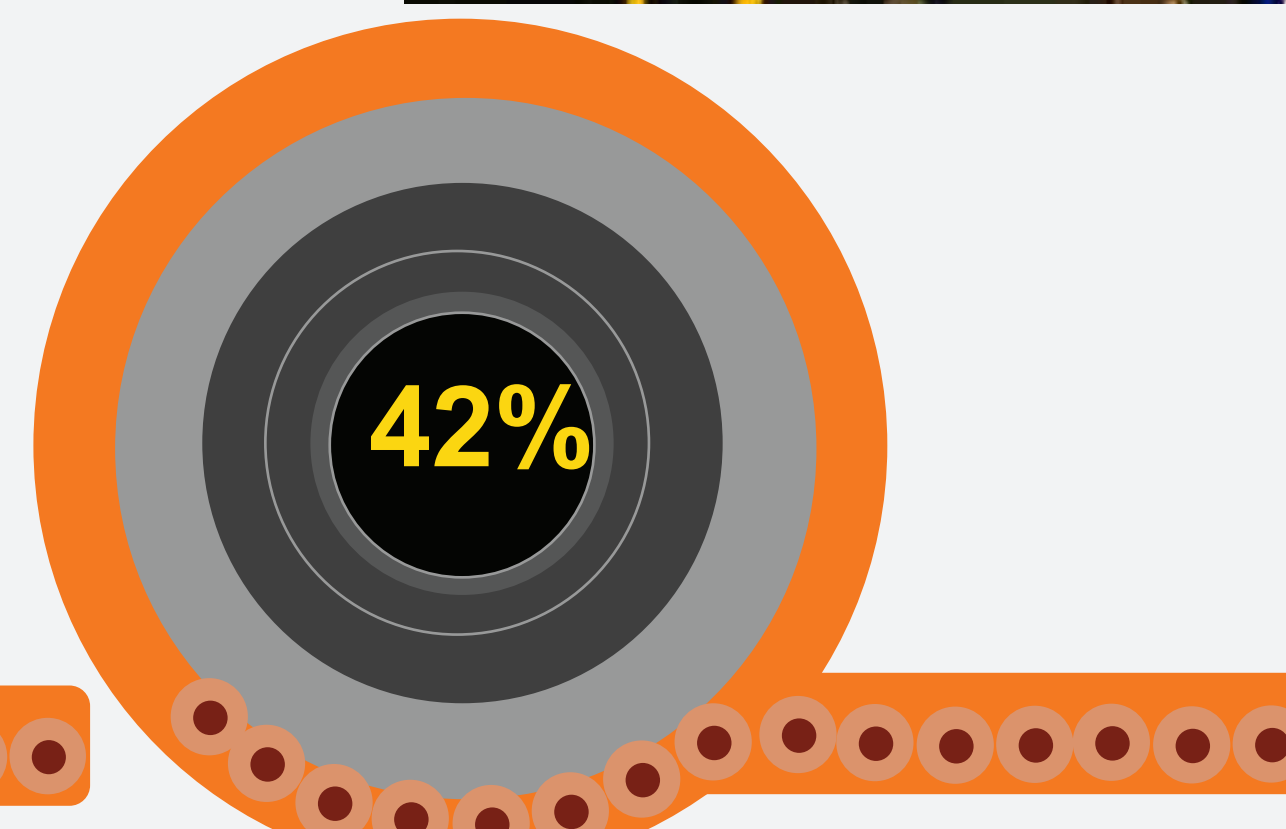

Humans vs. Zombies is a game of tag. This game is played on over 200 college campuses but is also played in high schools, military bases, summer camps and public libraries.

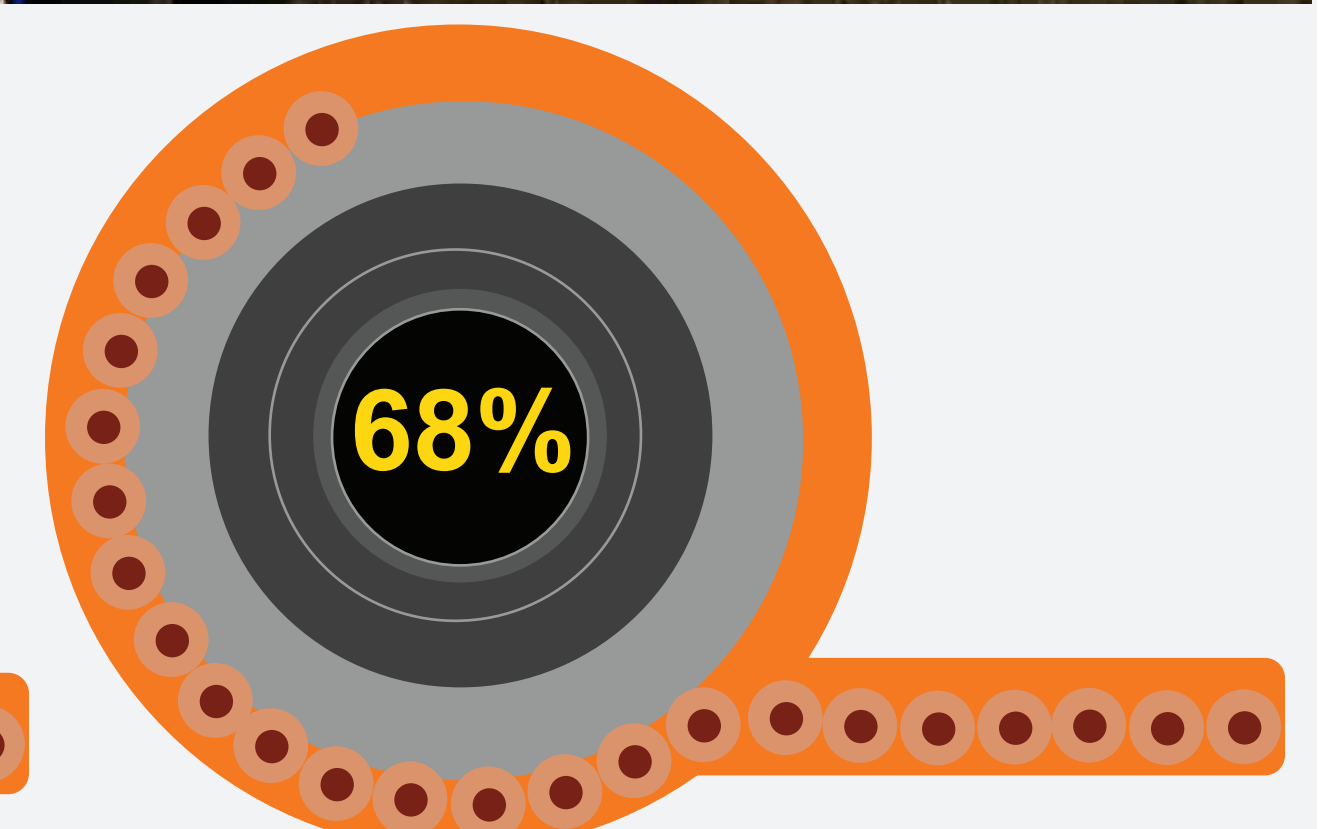

Currently use gear while playing

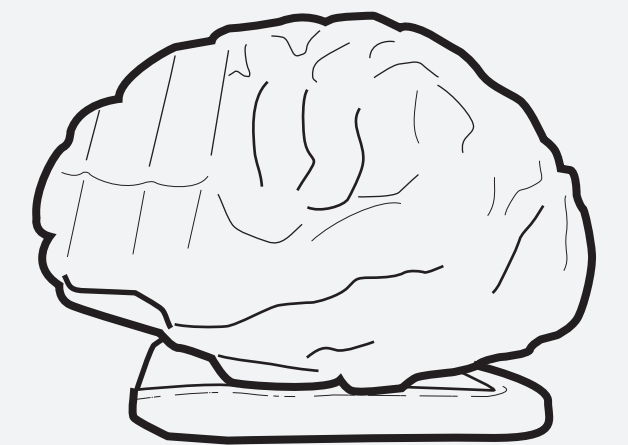

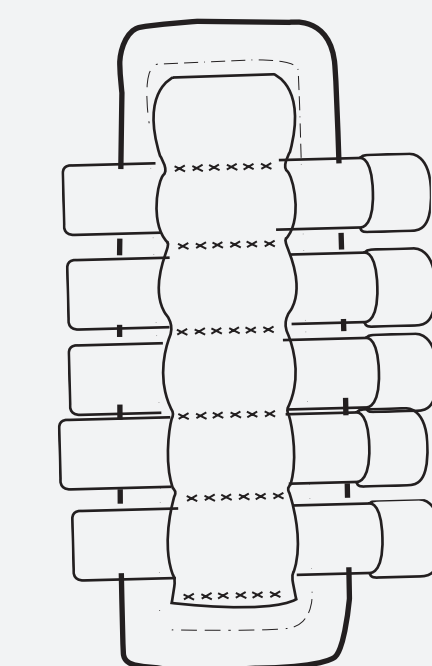

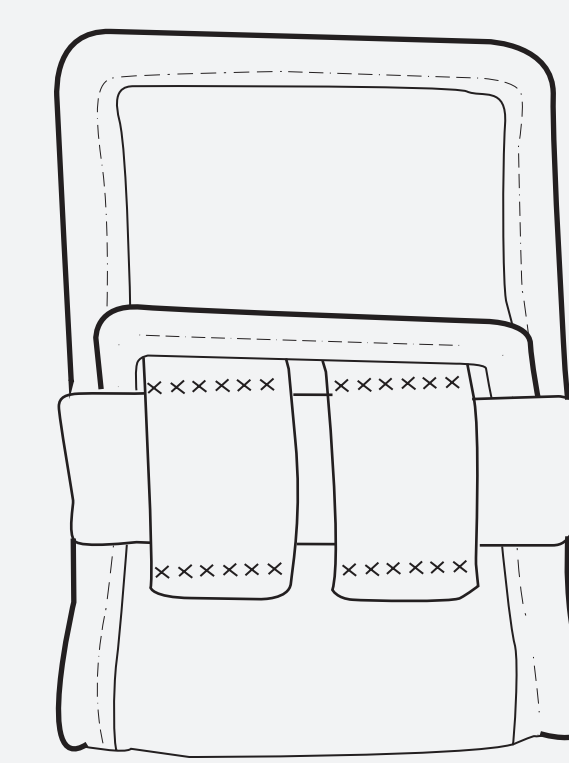

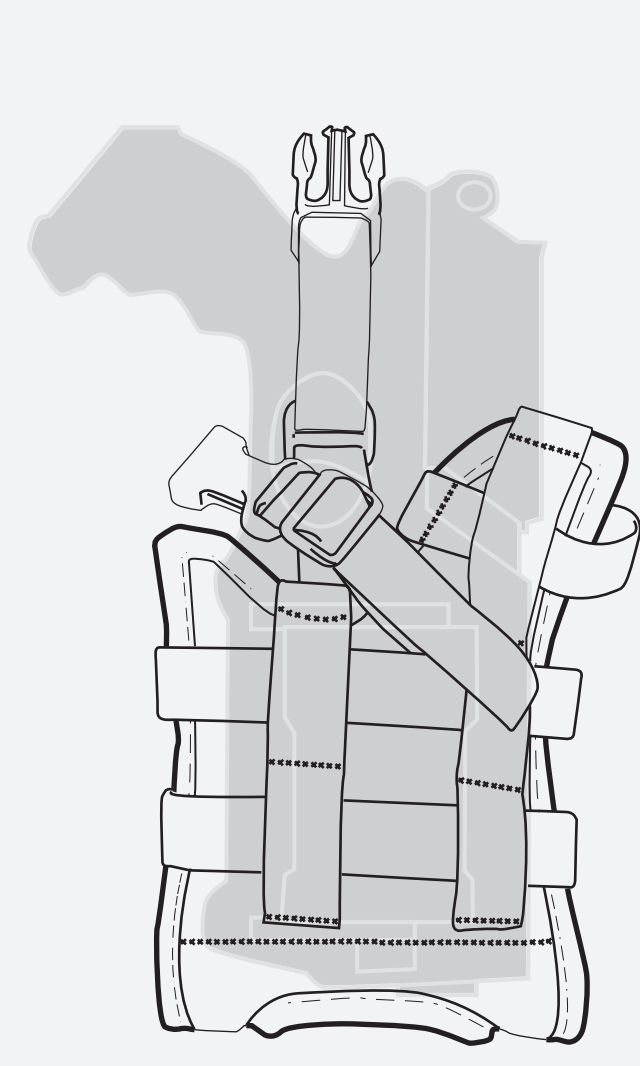

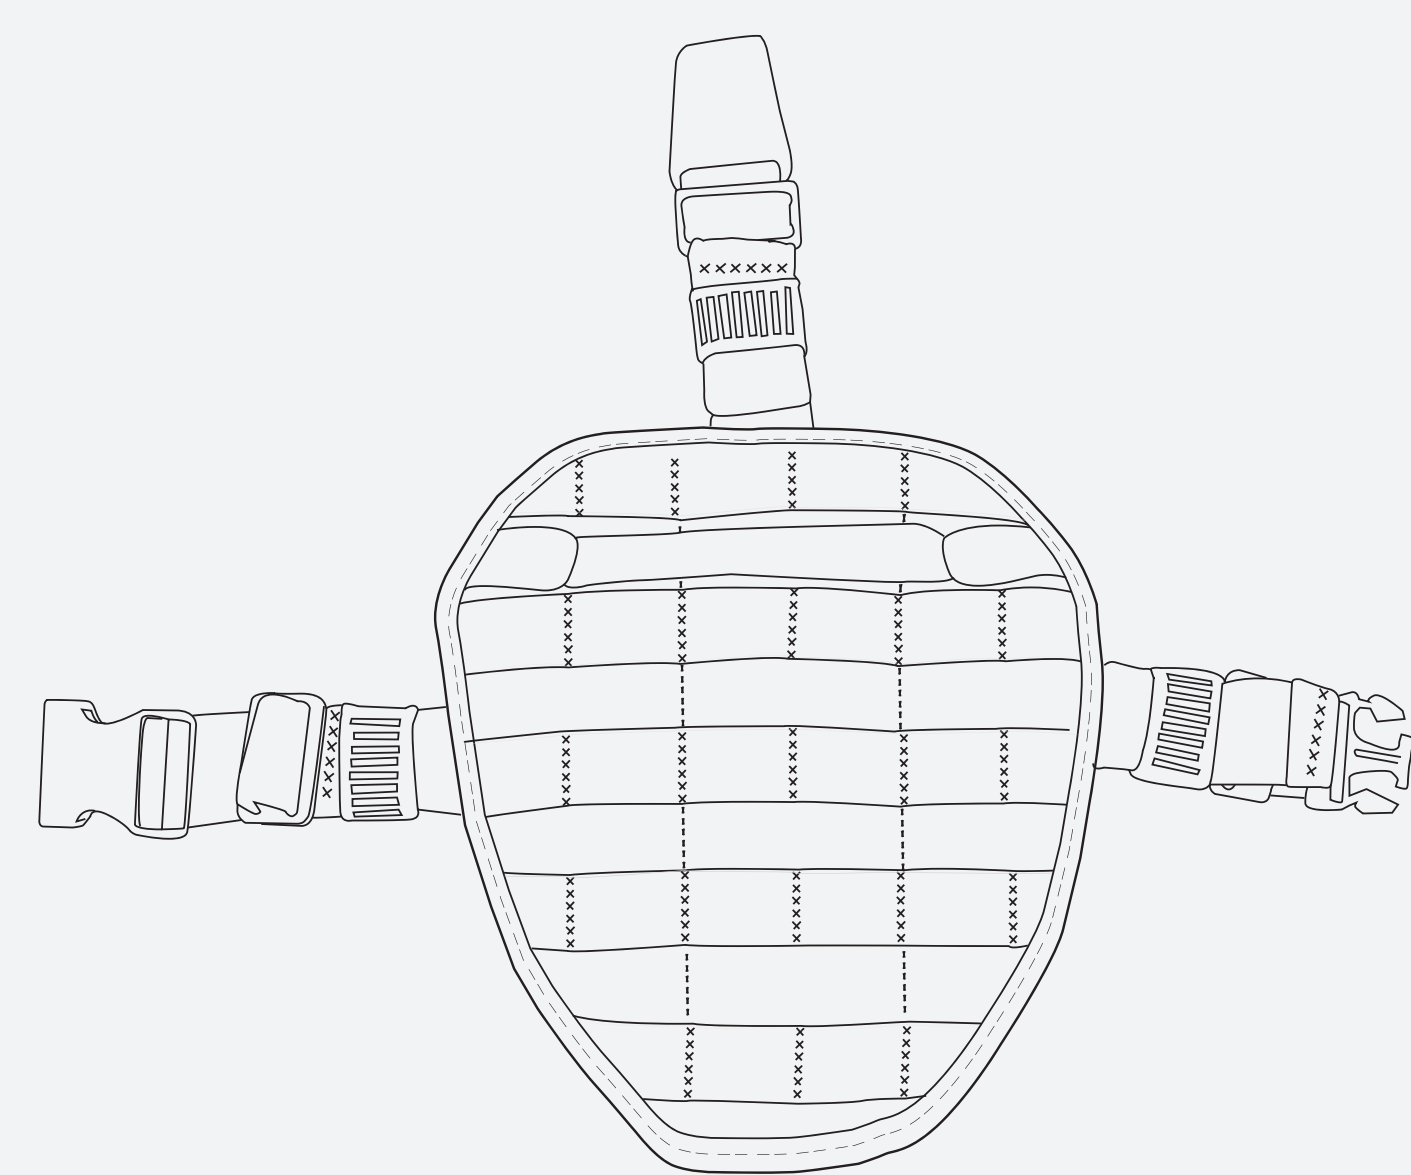

Would use HVZ specific gear

Currently use a holster for their blaster

Would use a holster specifically for their blaster

A drop leg Molle system was created. With it comes a universal holster, dart holder, clip holder, and sock Velcro pad. Included in this kit is a soft foam brain that you can Velcro to the sock pad and throw like a sock as well.
