BACKPACK OF THE FUTURE

campus of the future conference - hawaii - 2006
competition sponsored by Herman Miller

awarded first place

the event

Campus of the Future – will be held in Hawaii in early July 2006, and will bring together a broad audience from the Higher Education world. One of the key promises of the event is that it will "provide an opportunity to explore a vision of the trends, challenges and advancements anticipated for the Campus of the Future".

the problem statement

As technology, as well as other factors, continues to enable new ways of teaching and learning, how will the student / faculty member of the future handle the multiple pieces of technology that they will need throughout their day? Issues include ease of access, storage, power access, etc.

the request

As technology, as well as other factors, continues to enable new ways of teaching and learning, how will the student / faculty member of the future handle the multiple pieces of technology that they will need throughout their day? Issues include ease of access, storage, power access, etc.
