

storage

expandable side access
storage pockets allow for
the student to carry whatever
needed to complete the task.

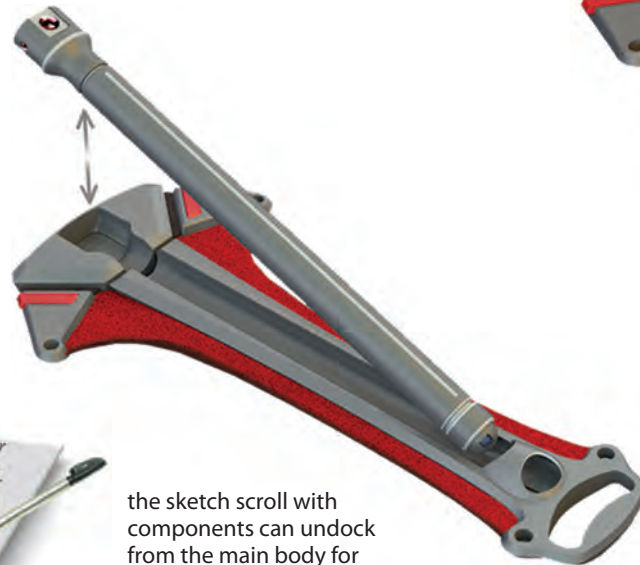

laptop computer

the V-PAC transforms to become
a fully functioning laptop computer
workstation. with an electronic
charge to the memory metal, the
screen stiffens and adjusts to find
just the right angle. when docked
into the pack, the digital camera
doubles as a web camera for video
conference capabilities. the
enhanced touch pad offers
more control for CAD
drawing tasks.

sketch

the roll-up computer screen converts
to a touch sensitive sketch pad. with
stylus in hand, the student can sketch
and overlay all ideas in any location
and weather condition.

the sketch scroll with
components can undock
from the main body for
ideation sketching and
other tasks.
