Where:
Parcel 104 Restaurant
Santa Clara Marriott
2700 Mission College Blvd.
Santa Clara, CA 95054

>>RSVP TODAY

We will be raffling an Apple iPAD!!

No matter what you do to automate and simplify your backup and DR environments, there are always headaches lurking. That is because whether you backup to tape, disk-to-disk, replicate and/or de-duplicate, backups are built on a framework that is decades old!

What's the result? Your organization suffers. Back-ups impact production, backup windows continue to grow, and it becomes increasing more difficult to recover quickly, in a cost Effective, scalable way. Add in the need for an affordable DR strategy, and the migraine erupts.

At this Lunch & Learn, you will see & learn how to:
- Dramatically improve backup and recovery performance with little/no impact on your current environment
- Lower the total cost of protecting your data while improving reliability and application uptime
- Provide unified recovery management for diverse platforms, including disparate OS, Storage type, Virtual and Physical environments
- Incrementally integrate backup and DR strategies reducing the cost of managing disparate systems
- Provide Zero Backup Window & Zero Data Loss

All this at a cost that is sometime as low as your backup software's Maintenance contract!

Come learn how to reduce your RPO & RTO while adding the safety of an affordable DR solution to your IT infrastructure.
