

## An Unexpected Consequence...

The CPS was widely accepted by the Cyp-tian community and was put into produc-tion. Every Cyptian had a CPS and used them frequently. However, when I checked back in on them to see how my product was doing, I discovered something astonishing.... They had evolved and adapted in response to my product! The excessive use of their bottom legs for ma-nipulating the wheel had caused them to grow longer and stronger, and the top part of the body had grown shriveled and frail from being constantly concealed by the suit! The suit had an effect on the geogra-phy as well: All of the moisture extraction was causing the walls to become dryer and more dense...

Cyptia's Walls Before CPS

Cyptia's Walls After CPS
